TKT Module 3: Part 1 – Functions of Learner Language – Teacher’s Notes

Description

This activity will familiarise teachers with some of the terminology relating to the TKT Module 3 Part 1 syllabus area of ‘identifying the functions of language used by learners in the classroom’.

Time required: 40 minutes

Materials required:
- Participant’s worksheet 1 (cut into strips)
- Participant’s worksheet 2 (one for each participant)
- Sample Task (one for each participant)

Aims:
- To introduce some of the functions of language commonly used by learners in the classroom and to discuss examples of the functions.
- To provide practice in completing a task in which the functions of teacher language is the testing focus.

Procedure

1. (10 minutes) Before the session, cut up Participant’s worksheet 1 into strips containing a word or a definition. Give each participant one strip. There are eight words and eight definitions, organised in matching pairs on the worksheet. For example: ‘Clarify’ matches with ‘To make clear what you mean’. If there are fewer than sixteen participants, make sure that you give out words that match with a definition. If there are more than sixteen participants, use some of the strips more than once but make sure that you provide matching pairs of words and definitions.

2. Tell participants that they have either a word or a definition on their strips of paper. Ask them to walk around the room saying their word/definition to other participants until they find someone whose strip matches with theirs. When they find their partner they can sit down next to each other.

3. Check answers together (see key below). Tell participants that
   - these terms are all functions of language commonly used by learners in class
   - knowledge of these and other terms is tested in TKT Module 3 Part 1.

4. 15 minutes Hand out Participant’s worksheet 2. Ask participants to work with their partners and to write an example of each of the functions. For example: Agree – the learner might say “You’re right”.

5. Get participants to share their ideas with the whole group (see key below).

6. 10 minutes Give out the Sample Task. Ask participants to complete the sample task on their own then compare their answers with a partner, before checking answers with the whole group.
7. 5 minutes Round up to summarise points covered. Ask participants:

- **What is the TKT Module 3 syllabus area for this lesson?** (functions commonly used by the learner in the classroom)

- **What are candidates being tested on?** (Candidates are tested on their knowledge of and ability to identify common functions and typical exponents)

- **How can candidates prepare for this area of the syllabus?** (Candidates can study the list of examples of learner language in the TKT Glossary which is on the Cambridge ESOL website).
